FUND BALANCE DEFINITIONS

Fund balance, often referred to as reserves, is the difference between assets and liabilities reported in the City's governmental funds (i.e. General Fund). Generally there are limitations on how the resources of a governmental fund can be used. The force behind these limitations can vary significantly, depending on their source. Consequently, the fund balance reported in the annual financial statements is categorized into the five components as follows:

Non-spendable

Resources that are 1) not in spendable form, such as inventories, prepaids, long-term receivables, or non-financial assets held for resale, or 2) required to be maintained intact such as an endowment.

Restricted

Resources that are subject to externally enforceable legal restrictions; these restrictions would be either 1) externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments, or 2) imposed by law through constitutional provisions or enabling legislation.

Committed

■ Resources that are constrained to specific purposes by a formal action (i.e. resolution or ordinance) of the City Council that requires formal action at the same level to remove the commitment.

Assigned

Resources that are constrained by the City's intent to be used for specific purposes, but that are neither restricted nor committed. The intended use is established by the highest level of decision making, another body designated for that purpose (i.e. Finance Committee), or by an official designated for that purpose such as the Mayor or City Treasurer.

Unassigned (both 60 day requirement and available to spend)

Within the General Fund, the residual resources, either positive or negative, in excess of what can be properly classified in one of the other four fund balance categories (nonspendable, restricted, committed, and assigned).
