Compost Facility
at 307-632-5518.**

Revised May 2024

Products Descriptions & Costs

	5 GALLON	CUBIC YARD
Buffalo Chip Compost	\$.78	\$27.46
Produced from composted manure and stable bedding materials, leaves, grass clippings, and ground wood. Used to increase water holding capacity and improve soil structure when planting trees, grass, and bedding plants. Also used to top-dress existing turf grass, potted, and bedding plants and to provide soil nutrients, organics, and beneficial microbes. Use as a soil preparation for new sod and transplants into beds or pots.		

*Single Grind Mulch	\$.37	\$12.48
Wood chip mulch produced from ground brush and limbs. Use as a decorative cover around trees, shrubs, and other plants to hold in moisture and limit growth of grass and weeds.		

*Double Grind Mulch	\$.47	\$16.64
Wood chip mulch ground extra fine. Used for decorative mulch cover and natural weed barrier.		

Prepared Topsoil	\$.94	\$32.76
Screened topsoil blended with Buffalo Chip Compost. Primarily used directly into your flower boxes, planters, pots, new sod, and seed areas (eliminates the need for blending compost and topsoil).		

* These items are currently free, however prices are subject to change and charges may apply.

Prices may be subject to change, please check current prices posted at the Public Compost Facility.

METHODS OF PAYMENT

Cash, Checks , and Credit Cards are accepted.

NO SALES ON SUNDAYS

We are available to load all bulk volume sales into open top trucks and trailers with our loader. However, the Compost Facility is not equipped with a scale, quantities are estimated based on the following:

- One cubic yard equals to approximately 40 x 5-gallons buckets.
- One leveled, standard 6.5' bed pickup truck load equals to 2.5 cubic yards. Customers should communicate with the operator their vehicle max payload.
